

Notes from the Editor-in-Chief

Economic Analysis (EA) publishes original research papers, case studies, conference papers, book reviews and other peer papers.

The spring issue is an exploration into the nature of sustainable development under impact of the crisis, green growth as a generator for overcoming the crisis and environmental taxation as a tool for sustainable development. In addition, this issue covers other topics such as foreign direct investment and political risk (case study), macro-prudential-old or new view at the financial stability and PEST analysis of Serbia.

EA aims for a high desk-rejection rate. Manuscripts lacking theoretical foundation and methodological rigor will not enter the review process.

Please, submit your own research to EA and thus ensure that your articles reach the knowledgeable and international readership that they deserve.

Since 2013, registration and login are required to submit items online. There you can also check the status of current submissions. All information is on the site www.iem.bg.ac.rs

Thank you!

A handwritten signature in black ink, reading "prof. dr. Mirjana Radović-Marković". The signature is written in a cursive style.
