

Foreword of Editor-in-Chief

I would like to express my great pleasure because we are ending this calendar year with a better categorization of the Journal of Women's Entrepreneurship and Education (JWEE), in relation to the last year. From 2009, when this journal was created, it was promoted twice by the Ministry of Education, Science and Technological Development of the Republic of Serbia. It is currently in the category M52 because of the great number of quality papers, whose authors were the scientists from more than thirty countries, from all the continents. What gives the special quality to these papers is the fact that most of them are original scientific empirical research papers, and as such they give a special contribution to the issues addressed in the journal. Also, the contribution to the quality of the journal is given by all the members of the editorial staff, who create each issue with great love all these years. This issue is financially supported by the Faculty of Business Economics and Entrepreneurship.

I have to specially point out the fact that this scientific journal has extended its themes and has always focused on those themes which are prioritized because of their actuality. I expect for this trend to continue and for the issues of female entrepreneurship and education to continue to fascinate scientific and professional public, which will result in larger number of authors and papers.

The invitation is open to everyone to send in their papers for 2014, for the special issue of the journal with the topic **WOMEN LEADERSHIP, GENDER BALANCE AND ENTREPRENEURSHIP** (Submission Deadline: March 1, 2014).

Editor-in-Chief
